MS16 & UMS16 (16ft)

MS25 & UMS25 (25ft)

Phoenix International Ltd is a small minority woman owned business that realized decades ago that stopping high-speed chases is a dangerous operation for law enforcement. In 1986 Phoenix International was the first manufacturer to introduce tire deflation devices (TDD) to the US market and demonstrate the effectiveness of tire spikes as a public safety tool. It's the industry leader of TDD's in the war against terrorism, drug trafficking, border protection and high security check points and has a 100% record of safe, successful vehicle stops.

Clients Include Government/Military :

- All five branches of the military and all Federal Law Enforcement Agencies including State, County and City Government nationwide
- International Law Enforcement Agencies such as NATO and the UN
- Foreign Countries approved by The Department of Commerce

What sets MagnumSpike! Apart from the Competition:

- 100 % Proven Effective
- 100% Safety Record
- Easy to Deploy in Seconds
- Deflates Run-flat & Semi Tires
- Reusable, Field Serviceable
- Free Replacement Parts
- Free Certified Training
- Patented 2 ½" Spike- Never Clogs

SafetyAct Certified

We hold the Department of Homeland Security's Certificate of Conformance through the SafetyAct
